SUMMARY

I am a Data Analyst with over 3 years of experience, adept in SQL-driven analysis, Power BI dashboards, and data quality management. My expertise lies in converting raw data into actionable insights through extraction, cleaning, and transformation. Proficient in working with Oracle and SQL Server environments, I also excel in using Excel and Power Query for advanced reporting, making me an asset in any data-driven organization

EXPERIENCE

Master Data Maintainer (Data Analytics & Reporting) | Royal IHC Jul 2025 - Present

- Designed and implemented data migration rules to ensure accurate and consistent master data.
- Conducted ad-hoc data analysis on ERP data using SQL to answer business questions and resolve data quality issues.
- Monitored and validated data quality to ensure reliable downstream reporting.
- Collaborated with cross-functional teams on data standards and governance.

Software Support Executive | Velox Solution Aug 2024 - June 2025

- Worked with Oracle databases on Linux environments, supporting data access, backups, and system stability.
- Assisted in application deployments and environment migrations, collaborating with developers to resolve runtime issues.
- Performed system readiness checks and operational validations prior to tool deployments.
- Created technical documentation (SOPs, user manuals) to support consistent system usage and onboarding.

Database Support Analyst | Capriconics InfoTech pvt. Ltd. Oct 2022 - May 2024

- Extracted and analyzed large datasets using complex SQL queries (joins, subqueries, CTEs) to deliver KPI reports that improved operational visibility for cross-functional teams.
- Designed and developed interactive Power BI dashboards using SQL and Excel data sources, enabling stakeholders to track KPIs, trends, and performance metrics through dynamic filters and slicers.
- Performed data cleaning, transformation, and preparation using advanced Excel functions (VLOOKUP, IF, CONCATENATE) to ensure reporting accuracy.
- Published and shared dashboards and reports via SharePoint, enabling cross-team visibility and collaboration.
- Conducted data validation and quality assurance to ensure accuracy and consistency of reported metrics.
- Maintained reporting datasets and tracking spreadsheets to monitor processes and performance trends.

SKILLS

- Data Analytics & BI:** SQL (Advanced Queries, Joins, CTEs), Power BI (DAX, Dashboards, Reports), Advanced Excel, Python (Basic Web Scraping)
- Databases & Data Systems:** Oracle Database (11g, 19c), MySQL, SQL Server (SSMS), Data Quality & Validation
- Data Engineering Foundations:** Linux, ETL Concepts, Performance Monitoring, Root Cause Analysis (RCA)
- Version Control & Development:** Git, GitHub
- Tools & Documentation:** JIRA, ITSM, SOP Creation, Technical Documentation

EDUCATION

Masters in Information Technology June 2022 - Aug 2024
ICS Khed

Bachelor of Information Technology Aug 2018 - June 2021
NKV Dapoli

PROJECTS

Web Scraping & Data Cleaning (Python Project)

- Scraped product pricing data using BeautifulSoup and Pandas
- Cleaned and transformed raw data for analysis
- Exported datasets to Excel and generated trend reports for price movement

Tools: BeautifulSoup, Pandas, Advanced Excel

Mini Sales Dashboard (Power BI)

- Built interactive Power BI dashboard using SQL and Excel data
- Used Power Query for data transformation and DAX for calculated metrics
- Visualized sales trends and performance KPIs

Tools: Power BI, Excel, SQL, Power Query Editor
